

nishanaairguns.com

Independent structural review · 2026-07-20

Health score

Business type: single-brand-anchor multi-SKU e-commerce (Star RX Gen 3 anchor + 7 imported BB pistol SKUs + accessories), India-only, regulated category

URLs analyzed: 29

Previous audit: 2026-07-19

Delta vs previous: -4 (75 → 71)

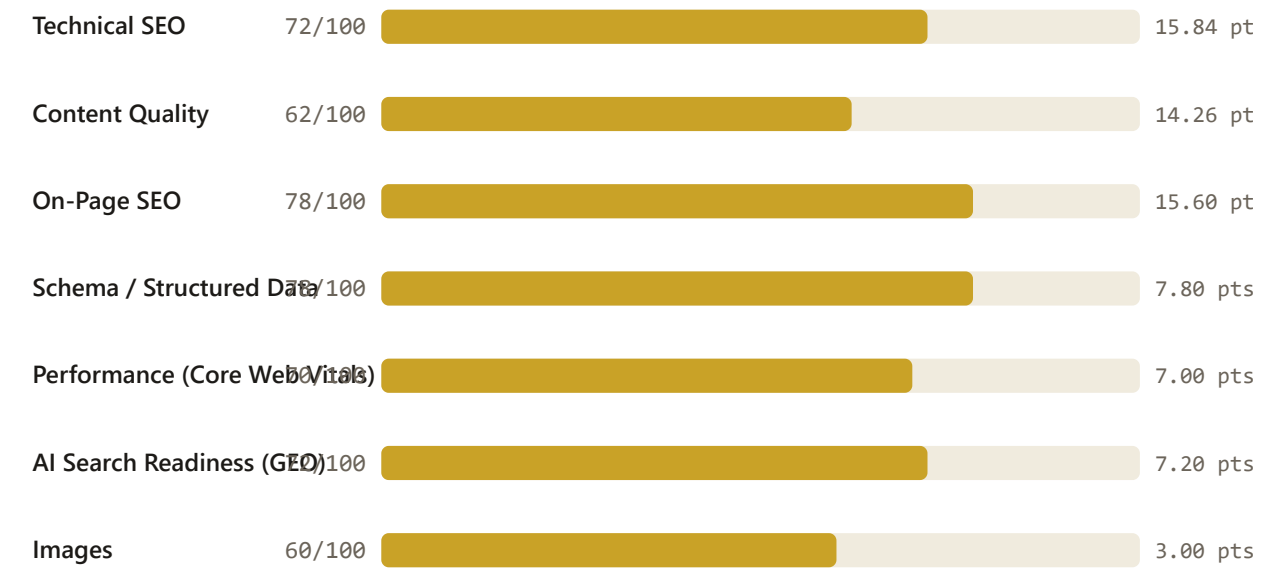

Top findings

1. 10 new product PDPs (aerosoft-x1, asg-x9-classic, beretta-84fs/m92-a1, kwc-k18/m92, hn-hornet-pellets, co2-cylinders-5, star-match-pellets, rx-gen3-magazine) return ~2 KB SPA stubs with client-side rendering — sitemap advertises them but Google will index the empty shells and mark the site as thin-content
2. www.nishanaairguns.com STILL returns HTTP 000 (7-day-old regression from prior audit — same finding as 2026-07-19)
3. /lms.txt STILL returns 404 (7-day-old regression from prior audit — strategy doc committed to shipping this)
4. Category pages still thin: air-pistols.html 77 words, accessories.html 68 words, products.html 138 words, spare-parts.html 91 words — near-zero visible content, no H2 hierarchy, and STILL zero JSON-LD
5. Homepage still lacks an answer-block for AI Overview eligibility (unchanged from prior audit)

Executive Summary

The score, what's working, what to do first.

Score by category

Weighted total: 70.70 → 71 / 100

Top findings (ordered by urgency)

1. 10 new product PDPs (aerosoft-x1, asg-x9-classic, beretta-84fs/m92-a1, kwc-k18/m92, hn-hornet-pellets, co2-cylinders-5, star-match-pellets, rx-gen3-magazine) return ~2 KB SPA stubs with client-side rendering — sitemap advertises them but Google will index the empty shells and mark the site as thin-content
2. www.nishanaairguns.com STILL returns HTTP 000 (7-day-old regression from prior audit — same finding as 2026-07-19)
3. /llms.txt STILL returns 404 (7-day-old regression from prior audit — strategy doc committed to shipping this)
4. Category pages still thin: air-pistols.html 77 words, accessories.html 68 words, products.html 138 words, spare-parts.html 91 words — near-zero visible content, no H2 hierarchy, and STILL zero JSON-LD
5. Homepage still lacks an answer-block for AI Overview eligibility (unchanged from prior audit)

Quick wins

1. Add Vercel domain alias so www → apex (5 min, unchanged from prior audit)
2. Publish /llms.txt with the strategy-defined content (10 min, unchanged from prior audit)
3. Add basic Product + Offer + BreadcrumbList JSON-LD to the 10 new stub PDPs — even without rendering, the schema in the HTML gives Google enough to treat them as products (15 min per template)
4. Add ItemList + BreadcrumbList JSON-LD to accessories.html + products.html + spare-parts.html (10 min)
5. Add answer-box + Speakable schema to homepage (15 min)
